Keymaster gives you the tools to customize keyboards, shortcuts, and other device settings on Mac. Keyboard shortcuts, one-time use gestures and device settings are just a few of the things you can customize with Keymaster. Keymaster is one of the few Mac applications that can properly customize a number of Mac devices. If you have a laptop, use an iPad, iPhone, iPod touch or any other Mac device, Keymaster can help you to make it perform just like your Mac. Forget about the limitations of Keychain. Keychain is designed to remember passwords and other sensitive data such as credit cards, but it has some serious limitations. It doesn't really offer the data protection you need to keep things secure and safe. Keymaster solves all of those problems. It remembers everything, so you don't need to worry about having to re-enter your sensitive data every single time you want to use it. Keymaster stores all of your sensitive data in one place, so you don't have to worry about forgetting any of your passwords. * * * * * * * * * * WHAT'S NEW Version 7.1.3: - Fixed a bug that prevented some commands from working - Fixed a bug that prevented some commands from working - Fixed a bug that prevented some commands from working - Added more context menus to the options WHAT'S NEW Version 7.1.2: - Fixed a bug that prevented some commands from working - Fixed a bug that prevented some commands from working - Fixed a bug that prevented some commands from working - Added more context menus to the options - Fixed a bug that prevented some commands from working - Fixed a bug that prevented some commands from working - Added more context menus to the options - Fixed a bug that

Calendarscope Picking a proper birthday gift for your loved ones might turn out to be harder than imagined, especially if you don't know what they might want. The same situation is applied for those who need to buy gifts for people they don't really know too well, which, in the end, proves to be time-consuming and nerve-wracking. Choose the desired format and apply custom colors and photos However, if you learned what actors, movies or TV shows they adore, a personalized calendar can turn out to be the best solution. The printed subject can vary from nature and animal landscapes to movies, artists or the Universe. Calendars can get you out of any tricky situations when you have no idea what to acquire. Asman Calendar Maker is one of the many apps on the Internet that comes packed with all the necessary elements to design multiple yearly and monthly calendars quickly. The program arrives in a small archive with a single executable and doesn't require any installation. The file can be copied to a USB flash drive and run on any computer. The provided interface is self-explanatory yet outdated and consists of a single window divided into three distinct areas, the calendar followed by the customization panel on the right and all the months neatly structured at the bottom. Hide the grind, pick the corresponding background and print them out From the main screen, you can choose what type of calendar you wish to create, monthly or yearly and the specific day style (English, Romanian, Europe). For the English mode, the week starts on Sunday while for Europe begins on Monday. You can start by changing the names of the days and months to best represent your country and language, along with the background opacity and image, which supports JPG, BMP, GIF, PNG and TIFF as file formats. You can toggle the foreground on/off and pick a solid color instead of a
