Live Wallpaper Maker for Android is a powerful application that enables you to create live wallpapers for Android devices. It is specially designed to make the process of live wallpaper creation much easier. With the help of this wonderful app, you will be able to easily design the most diverse and unique live wallpapers. All you have to do is select the template that you want to use and, in addition, if you want, you can choose to import a background image that you have already created. All that is required for the customization of the wallpaper is filling in the relevant fields. Furthermore, this tool also allows you to animate the new wallpaper. Thus, you can have your own multimedia live wallpaper for Android! Moreover, this application comes with an extended list of templates. In addition, you can choose between simple and complex. In the latter case, you will have an opportunity to customise the appearance and functionality of your live wallpaper. Furthermore, the integrated support for graphics or even animated GIFs enables you to create a truly innovative wallpaper. Live Wallpaper Maker for Android - Main Screen: Custom Live Wallpaper Creator is a versatile application that can help in the making of professional live wallpapers for Android enabled devices. It targets the average user and does not require any programming knowledge, as the building process of the wallpaper is performed by the program itself. The application embeds a rich array of templates that you can rely on to design a unique screen for your smartphone. Powered by a comprehensive and intuitive interface, Custom Live Wallpaper Creator gets you acquainted with all of the options right from the start. In the main GUI, there's a list of all the available live wallpaper scenarios. Thus, you can opt for a shake wallpaper, which will result in a screen that can be shaken based on a preset sensitivity or for a rotate wallpaper, whose name is self-explanatory. Moreover, you can design a new screen from multiple images and have them gathered in a slideshow view, as well as to build the wallpaper on top of a GIF animation. In addition, if you opt for the matrix wallpaper, you will be able to turn simple text strings into a matrix-like image. All the wallpapers will be saved in APK format by default, although you can set the program to export the source code as well (for developers). Not only does the application have the means to generate such resources, but it can also install the wallpaper on your device, provided that it is connected
